

Ticket reservation system

# Admin

- User login
- User management(user approve,block,add,remove,reset passwords)
- Time table management:
  - c/r/u/d train(start station , end station,start time,end time,price) (tickets are booking for end to end station not for other near stations allow)
  - Read reservations ticket for selected train
  - Set reserved reservation ticket
  - In station can create printed document using passenger (nic and date find):(reservation ticket ) for passenger :passenger take that and get on the train with this ticket

# user

- Registration( nic,phone number,name,address,password,etc)
- Login (nic,password)
- Search train
- Select and see the details train
- Create Reservation (cannot undo) if have available (seats or tickets(if tickets are limited))
-
